

Vegetable waxes by SIO

For luscious textures in colour cosmetics and creams

ADM's range of waxes from vegetable sources delivers desirable textures and builds viscosity in skin care products and colour cosmetics.

Vegetable waxes also provide a hydrating function and deliver protecting and regenerating properties.

Our state-of-the-art hydrogenation process ensures that our waxes maintain the required stability in formulations. The range of melting points ensures that we have the exact solution for your needs.

Our waxes are produced from:

Tropical oils:

- Palm
- Shea

Classic oils:

- Soya
- Rapeseed

Speciality oils:

- Olive
- Jojoba
- Argan
- Avocado
- Cotton

SIO's product development team is available to expand this product list to meet your specific requirements.

Quality comes first

Our ingredients come from carefully selected, non-GMO raw materials. They are manufactured under strict quality assurance conditions according to ISO 9001:2008 standards, GMP and HACCP methods.

Packaging / shelf life

- 25 kg paper bags
- 12 month shelf life in original, unopened packaging – storage at T < 18°C
